

Wellness Blood work Consent Form

It is very important for the health of your pet to get a comprehensive blood work panel at least once a year. This allows us to screen for common physical conditions and abnormalities that can affect pets as they age *that cannot and/or may not be evident* on your pets physical examination. **A yearly blood test for heartworm prevention and a fecal is required with your annual**, a few more drops will tell us so much more.

The following conditions are examples of ***SERIOUS CONDITIONS*** that your pet can be screened for by allowing the yearly wellness blood work:

*Liver Disease *Kidney Disease *Diabetes *Anemia *Infection *Cushing's Disease	*Thyroid disease *Long term medication usage on internal organs (ie arthritis medication, steroids, allergy medications etc) *Pancreatic disease *Protein loss
---	---

The key to a longer healthier quality of life for your pet is early detection and/or early intervention in therapy for these disease related conditions.

Our doctors firmly believe in a good physical examination *externally as well as internally* for your pet.

******If a urine sample is not collected at the time of the visit, there is a 30 day time frame from this exam to bring it in to send to the laboratory at no additional cost .***

This wellness includes a full complete blood count and comprehensive blood panel, heartworm test, urinalysis, Thyroid and a fecal parasite screening.

The cost for the Annual Wellness full Blood work for a dog is **\$191**, for a cat is **\$175**
(Savings of over \$275 when done at the time of your Pets Yearly Visit)

___ **YES!** I accept the full blood work for my pet.

___ **YES!** I accept the Heartworm and Fecal testing only for my pet for \$125.

___ **NO!** I decline the full panel blood work and the Heartworm and Fecal for my pet.
